

We Claim:

1. Apparatus for emptying a hose bag (1) comprising a cap-like mating part (2) fixed on one end of the hose bag (1), which has a pipe-shaped outlet opening (3) and a device arranged therein for opening the hose bag, characterized in that the device is a helical cutting blade (4).
2. Apparatus in accordance with claim 1, characterized in that the blade (4) can be rotatably displaced into the outlet opening (3) and in the hose bag direction by means of an insertable nozzle (5).
3. Apparatus in accordance with claims 1 and 2, characterized in that the blade (4) can be locked in an end position, wherein a hose bag (1) is cut open.
4. Apparatus according to one of the claims 2 to 3, characterized in that the nozzle (5) seals against the inner wall of the pipe-shaped outlet opening (3).
